

# Magento 2 Shipit Guide

Magento 2 Shipit extension adds support for all [Shipit shipping methods](#) to a Magento 2 store. You can also print shipping labels directly on the admin panel.

Before installing the module you will need to register for Shipit. You can start using the API credentials after you have been approved credit by Shipit. [Register now »](#)

## 1. Installation

Magento 2 Shipit is installed just like any other Magento 2 extension. The module is installed using `app/code` directory instead of Composer.

1. Extract the files to `app/code` directory so that they are located in `app/code/Markup/Shipit`. If `code` directory doesn't exist in the `app` directory, it needs to be created.
2. Go to Magento root directory using terminal / command line (SSH)
3. Run the following commands

```
composer require chriskonnertz/string-calc
php bin/magento module:enable --clear-static-content Markup_Shipit
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy en_US fi_FI
php bin/magento cache:flush
```

Please change the language codes on the line 5 to suit your requirements.

4. Module was successfully installed if the above commands didn't output any error messages.

## 2. Settings

Settings are located in *Stores > Configuration > Sales > Shipit*.

### 2.1 General Settings

<b>Enabled for Checkout</b>	Enables / disables all Shipit shipping methods.
<b>API Key</b>	API Key from Shipit.
<b>API Secret</b>	API Secret from Shipit.
<b>Mode</b>	Development / Production
<b>Package Contents</b>	Short description about package contents. E.g. "Consumer electronics"
<b>Tariff Code</b>	Tariff Code. Only required if shipping outside the EU.
<b>Pricing Method</b>	Pricing method, please see below for descriptions.

#### 2.1.1 Pricing Methods

Module allows pricing in two different ways.

##### **Flat rate / Math**

Shipping prices are fixed or based on mathematical formula. You can use [weight] placeholder for weight based pricing. For example, formula  $5+0,5*[weight]$  would mean 5 € + 0,5 € / kg.

##### **Weight classes**

Shipping prices are based on weight classes, for example 0 – 2 kg 5 € and 2 – 5 kg 7,5 €. The table is used to enter max weight and corresponding price.

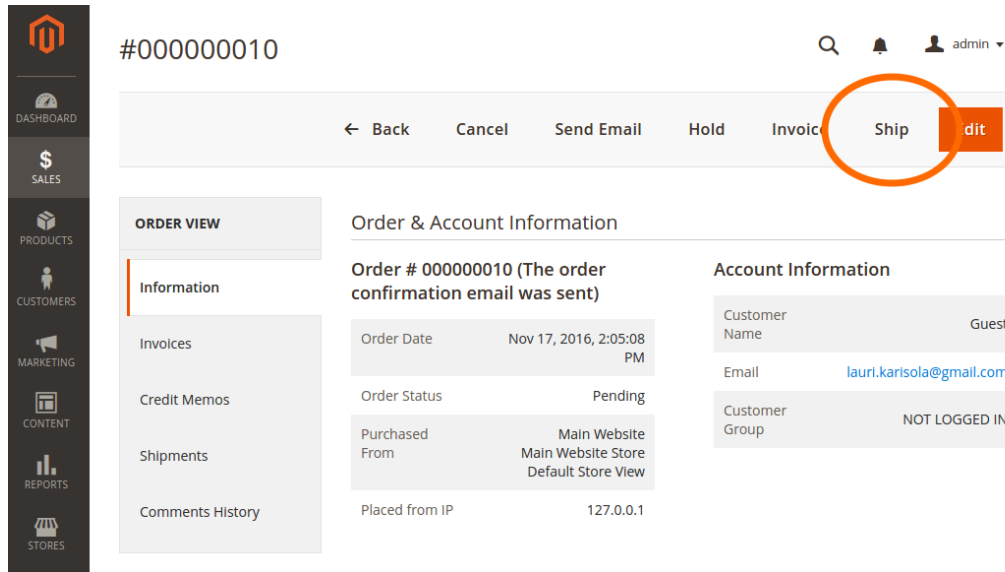

### 2.2 Shipping Method settings

[Shipping Method] Enabled for Checkout	Enables / disables shipping method
[Shipping Method] Title	Title shown on the checkout
[Shipping Method] Pricing	Pricing, please see 2.1.1 pricing methods
[Shipping Method] Free Shipping Amount Threshold	Orders with subtotal above this threshold will have free shipping.

### 3. Creating Shipping Labels

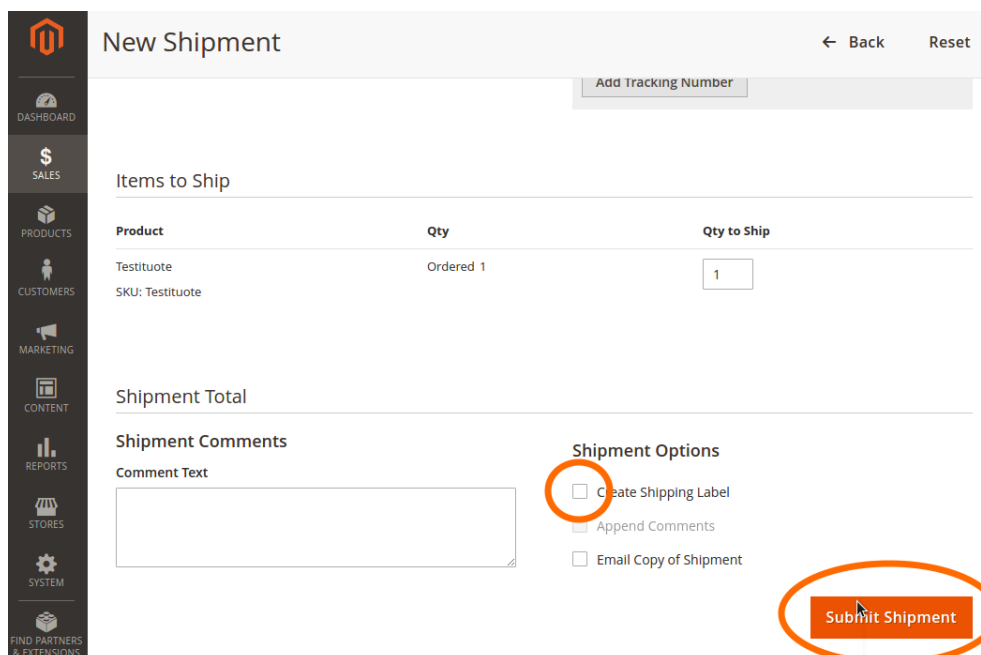

Shipping labels are created on the admin panel. Shipping label can be only created when the order has Shipit shipping method selected.

1. Go to *Sales > Orders* and choose the order
2. Click *Ship*

The screenshot shows the Magento admin panel for order #000000010. The 'Ship' button in the top navigation bar is circled in orange. The left sidebar contains navigation options: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, and STORES. The main content area is divided into 'ORDER VIEW' and 'Account & Account Information'. The 'ORDER VIEW' section includes 'Information', 'Invoices', 'Credit Memos', 'Shipments', and 'Comments History'. The 'Account & Account Information' section shows 'Order # 000000010 (The order confirmation email was sent)' with details: Order Date (Nov 17, 2016, 2:05:08 PM), Order Status (Pending), Purchased From (Main Website, Main Website Store, Default Store View), and Placed from IP (127.0.0.1). The 'Account Information' section shows Customer Name (Guest), Email (lauri.karisola@gmail.com), and Customer Group (NOT LOGGED IN).

3. Check *Create Shipping Label* and click *Submit Shipment*

The screenshot shows the 'New Shipment' form in the Magento admin panel. The 'Create Shipping Label' checkbox in the 'Shipment Options' section is circled in orange. The 'Submit Shipment' button at the bottom right is also circled in orange. The form includes a 'Back' and 'Reset' button, an 'Add Tracking Number' field, and a table for 'Items to Ship'. The table has columns for 'Product', 'Qty', and 'Qty to Ship'. The 'Shipment Total' section is empty. The 'Shipment Comments' section has a 'Comment Text' field. The 'Shipment Options' section includes checkboxes for 'Create Shipping Label', 'Append Comments', and 'Email Copy of Shipment'.

Product	Qty	Qty to Ship
Testituote SKU: Testituote	Ordered 1	1

4. Click *Add Products to Package* and choose the products you want to deliver. Finally, click *Add Selected Products to Package*

Create Packages

Package 1

Type Customs Value Total Weight Length Width Height

<input checked="" type="checkbox"/>	Product Name	Weight	Customs Value	Qty Ordered	Qty
<input checked="" type="checkbox"/>	Testituote	1.0000	100.00	1	1

5. Enter total weight and measurements. Please note that if units are in pounds and inches, they will be converted to kilograms and centimeters.  
Some of the shipping methods do not require correct measurements (e.g. Postipaketti). If dummy measurements are allowed for a shipping method, they will be automatically filled in. However, please ensure you do not ship oversized packages. Maximum measurements are provided by Shipit.
6. Click *Save*
7. The shipping label is now created. You can print it by clicking *Shipments > View > Print Shipping Label*
